

# Raissa Medeiros

I am a Brazilian Physical Therapist and always worked in NeuroPediatrics. I had the opportunity to take the course Pediasuit in December of 2015, I thought it was very different than everything had done before an interesting approach. However, I was very intrigued with many questions that the Pediasuit instructor did not have answers for my questions. I left the training without answers that is when I decided to take the Therasuit Protocol training, and also to understand the difference between the two methods. I had the opportunity to take the course with Isabela Koscielny and I can tell you that There is no comparison with the two Methods! The Therasuit Intensive Therapy Protocol Training is way more concise, complete and more efficient. Isabela explains the Method based on years of study and observation, scientific proof, explaining in depth exercise physiology and changes that occurs during therapy and intensive protocol. Therasuit is a wonderful Method, I fell in love with, Its worth the investment.
